

Product Data Sheet: NQ01 Rabbit Polyclonal Antibody

Cat. No: AB-84787

Conjugate: Unconjugated

Size: 100 ug Clone: **POLY Concentration:** 1mg/ml Host: Rabbit Isotype: IqG

The antiserum was produced against synthesized peptide derived from human Immunogen:

NQO1. AA range:203-252

Reactivity: Human, Mouse, Rat

Applications: Western Blot: 1/500 - 1/2000 Immunofluorescence: 1:50-200

Molecular Weight: 31kDa

The antibody was affinity-purified from rabbit antiserum by affinity-**Purification:**

chromatography using epitope-specific immunogen.

NQO1; DIA4; NMOR1; NAD(P)H dehydrogenase [quinone] 1; Azoreductase; DT-**Synonyms:**

diaphorase; DTD; Menadione reductase; NAD(P)H:quinone oxidoreductase 1;

Phylloquinone reductase; Quinone reductase 1; QR1

This gene is a member of the NAD(P)H dehydrogenase (guinone) family and encodes a cytoplasmic 2-electron reductase. This FAD-binding protein forms homodimers and reduces quinones to hydroquinones. This protein's enzymatic activity prevents the one electron reduction of quinones that results in the production of radical species. Mutations in this gene have been associated with

Background: tardive dyskinesia (TD), an increased risk of hematotoxicity after exposure to

benzene, and susceptibility to various forms of cancer. Altered expression of this protein has been seen in many tumors and is also associated with Alzheimer's disease (AD). Alternate transcriptional splice variants, encoding different

isoforms, have been characterized.

Form: Liquid

Buffer: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Storage: Store at -20°C. Avoid repeated freeze-thaw cycles.

For Research use only **IMMUNOLOGICAL SCIENCES**
