

Cat. No:	AB-84821
Conjugate:	Unconjated
Size:	100 ug
Clone:	POLY
Concentration:	1mg/ml
Host:	Rabbit
Isotype:	IgG
Immunogen:	Recombinant fusion protein containing a sequence corresponding to amino acids 26-253 of human Adipsin.
Reactivity:	Human,Mouse
Applications:	Western Blot: 1:500 - 1:2000
Molecular Weight:	27kDa
Purification:	Affinity Purified
Synonyms:	DF; ADN; PFD; ADIPSIN; CFD
Background:	This gene encodes a member of the S1, or chymotrypsin, family of serine peptidases.This protease catalyzes the cleavage of factor B, the rate-limiting step of the alternative pathway of complement activation. This protein also functions as an adipokine, a cell signaling protein secreted by adipocytes, which regulates insulin secretion in mice. Mutations in this gene underlie complement factor D deficiency, which is associated with recurrent bacterial meningitis infections in human patients. Alternative splicing of this gene results in multiple transcript variants. At least one of these variants encodes a preproprotein that is proteolytically processed to generate the mature protease.
Form:	Liquid
Buffer:	PBS with 0.02% sodium azide,50% glycerol,pH7.3.
Storage:	Store at -20°C. Avoid freeze / thaw cycles.
