

Product Data Sheet: Alexa Fluor 568, Donkey anti-rabbit IgG(H+L) Highly cross-ads.

Cat. No: IS20098-1

Size: 1 mg
Clone: POLY
Concentration: 2mg/ml
Host: Donkey
Isotype: IgG

Applications: 1-10 μg/mL of the IgG conjugate for most applications (appropriate dilutions of the

conjugate should be determined empirically).

Purification: Aff. Pur.

Reactivity:

Alexa Fluor™ dyes are superior to Cy-dyes for antibody labeling by having combined

Background: advantages in brightness, photostability, specificity and novel feature ideal for in vivo

imaging

Rabbit

Form: liquid

Buffer: pH~7.4 PBS containing 50% glycerol, 2 mg/ml bovine serum albumin (IgG-free and

protease-free) and 0.05% sodium azide.

Store at 4°C for several months. Protect from light. For longer storage, divide the

Storage: conjugate into small aliquots and freeze at -20°C. Avoid repeated freezing and

thawing.

Properties: Color and Form: Pink solution Spectral Property: λabs/λem = 562/583 nm (in pH 7.4

PBS buffer) Alexa Fluor™ 568 is spectrally similar to Atto565, dy560, Rhodamine Red.
