

Conjugate:UnconjugatedSize:100 ugClone:POLYConcentration:Img/mlHost:RabbitIsotype:IgGImmunogen:Synthesized peptide derived from B-lymphocyte antigen CD19 at AA range: 191-240Reactivity:Human, Mouse, RatApplications:Western Blot: 1:500-2000 Flow Cytometry: 1:50-200 Immunohistochemistry(paraffin-embedded tissues): 1:100-500 ELISA: 1:500-20000Molecular Weight:61 kDaPurification:The antibody was affinity-purified from rabbit antiserum by affinity- chromatography using epitope-specific immunogen.Synonyms:CD19; B-lymphocyte and differentiate in response to various concentrations of different antigens. The ability of the B cell to respond in a specific, yet sensitive manner to the various antigens is achieved with the use of low-affinity antigen artigen receptor of B lymphocytes in order to decrease the threshold for antigen receptor of B lymphocytes in order to decrease the threshold for antigen receptor of B lymphocytes in order to decrease the threshold for antigen receptor 0, 0.5% BSA and 0.02% sodium azide.Forane:Stora et -20°C. Avoid reneated freez-thaw cycles	Cat. No:	AB-84754
Clone:POLYConcentration:Img/mlHost:RabbitIsotype:IgGImmunogen:Synthesized peptide derived from B-lymphocyte antigen CD19 at AA range: 191-240Reactivity:Human, Mouse, RatApplications:Western Blot: 1:500-2000 Flow Cytometry: 1:50-200 Flow Cytometry: 1:50-200Molecular Weight:61 kDaPurification:CD19; B-lymphocyte antigen CD19; B-lymphocyte surface antigen B4; Differentiation antigen CD19; T-cell surface antigen B4; Differentiation antigens: Sn chieved with the use of low-affinity antigens: receptors. This gene encodes a cell surface molecule which assembles with the antigen receptor of B lymphocytes in order to decrease the threshol for antigen receptor de Blymphocytes in order to decrease the threshol for antigen receptor dependent stimulation.Form:Liquid In PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.	Conjugate:	Unconjugated
Concentration:Img/mlHost:RabbitHost:RabbitIsotype:IgGImmunogen:Synthesized peptide derived from B-lymphocyte antigen CD19 at AA range: 191-240Reactivity:Human, Mouse, RatApplications:Western Blot: 1:500-2000 Flow Cytometry: 1:50-200 Immunohistochemistry(paraffin-embedded tissues): 1:100-500 ELISA: 1:5000-20000Molecular Weight:61 kDaPurification:CD19; B-lymphocyte antigen CD19; B-lymphocyte surface antigen B4; Differentiation antigen CD19; T-cell surface antigen Leu-12; CD19Background:Lymphocytes proliferate and differentiate in response to various concentrations of manner to the various antigens is achieved with the use of low-affinity antigen receptors. This gene encodes a cell surface molecule which assembles with the antigen receptor of B lymphocytes in order to decrease the threshold for antigen CD19; 50% GJYCerol, 0.5% BSA and 0.02% sodium azide.	Size:	100 ug
Host:RabbitIsotype:IgGImmunogen:Synthesized peptide derived from B-lymphocyte antigen CD19 at AA range: 191-240Reactivity:Human, Mouse, RatApplications:Western Blot: 1:500-2000 Flow Cytometry: 1:50-200 Immunohistochemistry(paraffin-embedded tissues): 1:100-500 ELISA: 1:5000-20000Molecular Weight:61 kDaPurification:CD19; B-lymphocyte antigen CD19; B-lymphocytes untigen B4; Differentiation antigen CD19; T-cell surface antigen Leu-12; CD19Background:Lymphocytes proliferate and differentiate in response to various concentrations of different antigens. The ability of the B cell to respond in a specific, yet sensitive manner to the various antigens is achieved with the use of low-affinity antigen receptors. This gene encodes a cell surface molecule which assembles with the antigen receptor of B lymphocytes in order to decrease the threshold for antigen CD9; Supphocytes norder to decrease the threshold for antigen S0% glycerol, 0.5% BSA and 0.02% sodium azide.	Clone:	POLY
Isotype:IgGImmunogen:Synthesized peptide derived from B-lymphocyte antigen CD19 at AA range: 191-240Reactivity:Human, Mouse, RatApplications:Western Blot: 1:500-2000 Flow Cytometry: 1:50-200 Immunohistochemistry(paraffin-embedded tissues): 1:100-500 ELISA: 1:500-20000Molecular Weight:61 kDaPurification:The antibody was affinity-purified from rabbit antiserum by affinity- chromatography using epitope-specific immunogen.Synonyms:CD19; B-lymphocyte antigen CD19; B-lymphocyte surface antigen B4; Differentiation antigen CD19; T-cell surface antigen Leu-12; CD19Background:Symphocytes proliferate and differentiate in response to various concentrations of different antigens. The ability of the B cell to respond in a specific, yet sensitive manner to the various antigens is achieved with the use of low-affinity antigen receptor of B lymphocytes in order to decrease the wirteshold for antigen receptor descrease the unstigen receptor of B lymphocytes in order to decrease the ureshold for antigen receptor. This gene encodes a cell surface molecule which assembles with the astigen receptor of B lymphocytes in order to decrease the ureshold for antigen receptor. This gene encodes a cell surface molecule which assembles with the astigen receptor of B lymphocytes in order to decrease the ureshold for antigen receptor. This gene encodes a cell surface molecule which assembles with the astigen receptor of B lymphocytes in order to decrease the ureshold for antigen receptor.Form:LiquidBuffer:Liquid in PBS containing 50% glycenol, 0.5% BSA and 0.02% softum.	Concentration:	1mg/ml
Immunogen:Synthesized peptide derived from B-lymphocyte antigen CD19 at AA range: 191-240Reactivity:Human, Mouse, RatApplications:Western Blot: 1:500-2000 Flow Cytometry: 1:50-200 Immunohistochemistry(paraffin-embedded tissues): 1:100-500 ELISA: 1:5000-20000Molecular Weight:61 kDaPurification:The antibody was affinity-purified from rabbit antiserum by affinity- chromatography using epitope-specific immunogen.Synonyms:CD19; B-lymphocyte antigen CD19; B-lymphocyte surface antigen B4; Differentiation antigen CD19; T-cell surface antigen Leu-12; CD19Background:Lymphocytes proliferate and differentiate in response to various concentrations of different antigens. The ability of the B cell to respond in a specific, yet sensitive manner to the various antigen is achieved with the use of low-affinity antigen receptors.
