<b>Background:</b>	CD2 (cluster of differentiation 2) is a cell adhesion molecule found on the surface of T cells and natural killer (NK) cells. It has also been called T-cell surface antigen T11/Leu-5 LFA-2 LFA-3 receptor erythrocyte receptor and rosette receptor. It interacts with other adhesion molecules such as lymphocyte function-associated antigen-3 (LFA-3/CD58) in humans or CD48 in rodents which are expressed on the surfaces of other cells.
