

Product Data Sheet: CDK4 Rabbit Polyclonal Antibody

Cat. No: AB-80582

Conjugate: Unconjugated

Size: 100µg Clone: **POLY Concentration:** 1mg/ml Host: Rabbit Isotype: IgG

The antiserum was produced against synthesized peptide derived from the N-Immunogen:

terminal region of human CDK4. AA range:1-50

Reactivity: Human; Rat; Mouse

Western Blot: 1/500 - 1/2000 Immunfluorescence: 1:50-200 **Applications:**

Immunohistochemistry (paraffin embedded tissues): 1:100-300

Molecular Weight:

The antibody was affinity-purified from rabbit antiserum by affinity-**Purification:**

chromatography using epitope-specific immunogen.

Synonyms: CDK4; Cyclin-dependent kinase 4; Cell division protein kinase 4; PSK-J3

> cyclin dependent kinase 4(CDK4) Homo sapiens The protein encoded by this gene is a member of the Ser/Thr protein kinase family. This protein is highly similar to the gene products of S. cerevisiae cdc28 and S. pombe cdc2. It is a catalytic subunit of the protein kinase complex that is important for cell cycle G1 phase

progression. The activity of this kinase is restricted to the G1-S phase, which is

controlled by the regulatory subunits D-type cyclins and CDK inhibitor **Background:**

p16(INK4a). This kinase was shown to be responsible for the phosphorylation of retinoblastoma gene product (Rb). Mutations in this gene as well as in its related proteins including D-type cyclins, p16(INK4a) and Rb were all found to be associated with tumorigenesis of a variety of cancers. Multiple polyadenylation

sites of this gene have been reported.

Form: Liquid

Buffer: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Storage: Store at -20°C. Avoid freeze / thaw cycles.

> For Research use only **IMMUNOLOGICAL SCIENCES**
