

Product Data Sheet: FGFR4 Rabbit Monoclonal Antibody

Cat. No: MAB-94770
Conjugate: Unconjugated

Size: 100 ug

Clone: ARC1474

Concentration: 1mg/ml

Host: Rabbit

Isotype: IgG

Immunogen: A synthetic peptide corresponding to a sequence within amino acids 700-802 of

human FGFR4.

Reactivity: Human, Mouse

Applications: Western Blot: 1:500 - 1:2000 Immunohistochemistry (Paraffin-embedded tissues):

1:50 - 1:200

Molecular Weight: 95KDa/125KDa

Purification: Affinity purification

Synonyms: TKF; JTK2; CD334

The protein encoded by this gene is a tyrosine kinase and cell surface receptor for fibroblast growth factors. The encoded protein is involved in the regulation of several pathways, including cell proliferation, cell differentiation, cell migration, lipid metabolism, bile acid biosynthesis, vitamin D metabolism, glucose uptake, and phosphate homeostasis. This protein consists of an extracellular region, composed of three immunoglobulin-like domains, a single hydrophobic

membrane-spanning segment, and a cytoplasmic tyrosine kinase domain. The

extracellular portion interacts

with fibroblast growth factors, setting in motion a cascade of downstream signals,

ultimately influencing mitogenesis and differentiation.

Form: Liquid

Background:

Buffer: PBS with 0.02% sodium azide,0.05% BSA,50% glycerol,pH7.3.

Storage: Store at -20°C. Avoid freeze / thaw cycles.
