

| | |
|--------------------------|--|
| Cat. No: | AB-83854 |
| Size: | 100 ug |
| Clone: | POLY |
| Concentration: | 1mg/ml |
| Host: | Rb |
| Isotype: | IgG |
| Immunogen: | Recombinant fusion protein containing a sequence corresponding to amino acids 1-373 of human GS |
| Reactivity: | Hu, Ms, Rt |
| Applications: | Western Blot: 1:500 -1:2000 Immunohistochemistry: 1:50 - 1:200 Immunofluorescence: 1:50 - 1:200 |
| Molecular Weight: | 42kDa |
| Purification: | Aff. Pur. |
| Synonyms: | GS; GLNS; GS; PIG43; PIG59; glutamine synthetase |
| Background: | <p>The protein encoded by this gene belongs to the glutamine synthetase family. It catalyzes the synthesis of glutamine from glutamate and ammonia in an ATP dependent reaction. This protein plays a role in ammonia and glutamate detoxification, acid-base homeostasis, cell signaling, and cell proliferation. Glutamine is an abundant amino acid, and is important to the biosynthesis of several amino acids, pyrimidines, and purines. Mutations in this gene are associated with congenital glutamine deficiency, and overexpression of this gene was observed in some primary liver cancer samples. There are six pseudogenes of this gene found on chromosomes 2, 5, 9, 11, and 12. Alternative splicing results in multiple transcript variants. GS Polyclonal antibody is KO validated.</p> |
| Form: | Liquid |
| Buffer: | PBS with 0.02% sodium azide, 50% glycerol, pH7. |
| Storage: | Store at -20°C. Avoid freeze / thaw cycles. |
