

Product Data Sheet: HISTONE H2A Rabbit Polyclonal Antibody

Cat. No:

Conjugate:

Size:

100 ug

Clone:

Polyclonal

Concentration:

Host:

Rabbit

Isotype:

IgG

Immunogen: Synthesized peptide derived from the Internal region of human Histone H2A.

20-50

Reactivity: Human, Mouse, Rat

Applications: Western Blot 1:500- 1:2000 IHC(p) 1:100-1:300 Elisa: 1:20000

Molecular Weight: 15kd

Purification: affinity purified

Synonyms: HIST1H2AG; H2AFP; HIST1H2AI; H2AFC; HIST1H2AK; H2AFD; HIST1H2AL; H2AFI;

HIST1H2AM; H2AFN; Histone H2A type 1; H2A.1; Histone H2A/p

Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Two molecules of each of the four core histones (H2A, H2B, H3, and H4) form an octamer, around which approximately 146 bp of DNA is wrapped in repeating units, called nucleosomes. The linker histone, H1, interacts with linker DNA between nucleosomes and

Background:If the linker historie, 11, interacts with linker blike blike bliker histories and functions in the compaction of chromatin into higher order structures. This gene

is intronless and encodes a replication-dependent histone that is a member of the

histone H2A family.

Transcripts from this gene lack polyA tails but instead contain a palindromic

termination element.

Form: Liquid

Buffer: PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide

Storage: Store at -20°C. Avoid repeated freeze-thaw cycles.
