

Product Data Sheet: IL6 RAbbit Polyclonal Antibody

Cat. No: AB-84785

Conjugate: Unconjugated

Size: 100 ug

Clone: POLY

Concentration: 1mg/ml

Host: Rabbit

Isotype: IgG

Immunogen: A synthetic peptide corresponding to a sequence within amino acids 30-212 of

human IL6

Reactivity: Human, Mouse, Rat

Applications: Western Blot: 1:500 - 1:1000 Immunofluorescence:1:50 - 1:200

Immunocytochemistry: 1:50 - 1:200

Molecular Weight: 24 kDa

Purification: Affinity purification

Synonyms: CDF; HGF; HSF; BSF2; IL-6; BSF-2; IFNB2; IFN-beta-2; IL6

This gene encodes a cytokine that functions in inflammation and the maturation of B cells. In addition, the encoded protein has been shown to be an endogenous pyrogen capable of inducing fever in people with autoimmune diseases or infections. The protein is primarily produced at sites of acute and chronic inflammation, where it is secreted into the serum and induces a transcriptional

inflammatory response through interleukin 6 receptor, alpha. The functioning of this gene is implicated in a wide variety of inflammation-associated disease states, including suspectibility to diabetes mellitus and systemic juvenile rheumatoid arthritis. Elevated levels of the encoded protein have been found in

virus infections, including COVID-19 (disease caused by SARS-CoV-2).

Form: Liquid

Background:

Buffer: PBS with 0.05% proclin300,50% glycerol,pH7.3.

Storage: Store at -20°C. Avoid freeze / thaw cycles.

For Research use only IMMUNOLOGICAL SCIENCES
