

Product Data Sheet: CD25 Rabbit Polyclonal Antibody

Cat. No: AB-81365

Conjugate: Unconjugated

Size:100μgClone:POLYConcentration:1mg/mlHost:RabbitIsotype:IgG

Immunogen: Immunogen A synthetic peptide corresponding to a sequence within amino acids

100-200 of human CD25.

Reactivity: Hu, Ms, Rt

Western Blot: 1:500 - 1:1000 Immunohistochemistry (paraffin-embedded tissues):

Applications: 1:50 - 1:200 Immunofluorescence: 1:50 - 1:200 Immunocytochemistry: 1:50 -

1:200 Flow Cytometry: C 1:50 - 1:200

Molecular Weight: 60KDa **Purification:** Aff. Pur.

Synonyms: p55; CD25; IL2R; IMD41; TCGFR; IDDM10

The interleukin 2 (IL2) receptor alpha (IL2RA) and beta (IL2RB) chains, together with the common gamma chain (IL2RG), constitute the high-affinity IL2 receptor.

Homodimeric alpha chains (IL2RA) result in low-affinity receptor, while

homodimeric beta (IL2RB) chains produce a medium-affinity receptor. Normally an integral-membrane protein, soluble IL2RA has been isolated and determined to result from extracellular proteolyisis. Alternately-spliced IL2RA mRNAs have been isolated, but the significance of each is presently unknown. Mutations in this gene

isolated, but the significance of each is presently unknown. Mutations in this gene are associated with interleukin 2 receptor alpha deficiency. Patients with severe Coronavirus Disease 2019 (COVID-19), the disease caused by the novel severe

acute respiratory syndrome coronavirus 2 (SARS-CoV-2), have significantly elevated levels of IL2R in their plasma. Similarly, serum IL-2R levels are found to be elevated in patients with different types of carcinomas. Certain IL2RA and IL2RB gene polymorphisms have been associated with lung cancer risk.

Form: Liquid

Buffer: PBS with 0.05% proclin300,50% glycerol,pH7.3.

Storage: Store at -20°C. Avoid freeze / thaw cycles.

For Research use only IMMUNOLOGICAL SCIENCES
