

## Product Data Sheet: Laminin β-2 Rabbit Polyclonal Antibody

**Cat. No:** AB-E9720

Conjugate: Unconjugated

Size: 100 ug

Clone: POLY

Concentration: 1mg/ml

Host: Rabbit

Isotype: IgG

Immunogen: The antiserum was produced against synthesized peptide derived from human

LAMB2. AA range:61-110

Reactivity: Human; Mouse; Rat

**Applications:** Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300

Molecular Weight: 210kDa

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

LAMB2; LAMS; Laminin subunit beta-2; Laminin B1s chain; Laminin-11 subunit beta; Laminin-14 subunit beta; Laminin-15 subunit beta; Laminin-3 subunit b

Laminin-4 subunit beta; Laminin-7 subunit beta; Laminin-9 subunit beta; S-

laminin sub

Laminins, a family of extracellular matrix glycoproteins, are the major

noncollagenous constituent of basement membranes. They have been implicated in a wide variety of biological processes including cell adhesion, differentiation, migration, signaling, neurite outgrowth and metastasis. Laminins, composed of 3 non identical chains: laminin alpha, beta and gamma (formerly A, B1, and B2, respectively), form a cruciform structure consisting of 3 short arms, each formed by a different chain, and a long arm composed of all 3 chains. Each laminin chain

by a different chain, and a long arm composed of all 3 chains. Each laminin chain is a multidomain protein encoded by a distinct gene. Several isoforms of each chain have been described. Different alpha, beta and gamma chain isomers combine to give rise to different heterotrimeric laminin isoforms which are

designated by Arabic numerals in the order of their

discovery, i.e. alpha1beta1gamma1 heterotrimer is laminin 1.

Form: Liquid

**Background:** 

**Buffer:** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

**Storage:** Store at -20°C. Avoid repeated freeze-thaw cycles.
