

## Product Data Sheet: MMP-1 Rabbit Polyclonal Antibody

**Cat. No:** AB-84794

Conjugate: Unconjugated

Size: 100 ug

Clone: POLY

Concentration: 1mg/ml

Host: Rabbit

Isotype: IgG

Immunogen: The antiserum was produced against synthesized peptide derived from human

MMP-1. AA range:411-460

**Reactivity:** Human, Mouse, Rat

Applications: Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300.

Immunofluorescence: 1/200 - 1/1000

Molecular Weight: 54kD

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Synonyms: MMP1; CLG; Interstitial collagenase; Fibroblast collagenase; Matrix

metalloproteinase-1; MMP-1 matrix metallopeptidase 1(MMP1) Homo sapiens

This gene encodes a member of the peptidase M10 family of matrix

metalloproteinases (MMPs). Proteins in this family are involved in the breakdown

of extracellular matrix in normal physiological

processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. The encoded preproprotein is proteolytically processed to generate the mature protease. This secreted protease breaks down the interstitial collagens, including types I, II, and

III. The gene is part of a cluster of MMP genes on chromosome 11. Mutations in this gene are associated with chronic obstructive pulmonary disease (COPD). Alternative splicing results in multiple transcript variants, at least one of which

encodes an isoform that is proteolytically processed.

Form: Liquid

**Background:** 

**Buffer:** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

**Storage:** Store at -20°C. Avoid repeated freeze-thaw cycles.
