

Product Data Sheet: MMP-14 / MT1-MMP Rabbit Polyclonal Antibody

Cat. No: AB-82146

Conjugate: Unconjugated

Size: 100 ug

Clone: POLY

Concentration: 1mg/ml

Host: Rabbit

Isotype: IgG

Immunogen: The antiserum was produced against synthesized peptide derived from human

MMP-14. AA range:471-520

Reactivity: Human, Mouse, Rat

Applications: Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300

Molecular Weight: 65kDa

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

MMP14; Matrix metalloproteinase-14; MMP-14; MMP-X1; Membrane-type matrix

Synonyms: metalloproteinase 1; MT-MMP 1; MTMMP1; Membrane-type-1 matrix

metalloproteinase; MT1-MMP; MT1MMP

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as

inactive proproteins which are activated when cleaved by extracellular

Background: proteinases. However, the protein encoded by this gene is a member of the

membrane-type MMP (MT-MMP) subfamily; each member of this subfamily contains a potential transmembrane domain suggesting that these proteins are expressed at the cell surface rather than secreted. This protein activates MMP2

protein, and this activity may be involved in tumor invasion.

Form: Liquid

Buffer: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Storage: Store at -20°C. Avoid repeated freeze-thaw cycles
