

Product Data Sheet: Nestin

Cat. No: MAB-10430 Conjugate: Unconjugated

Size: 100 ug Clone: 10C2

Concentration: 1mg/ml Ms Host: Isotype: lgG1

Immunogen: A 150-amino-acid fragment from the cloned human Nestin conjugated to GST

Reactivity: Hu

IHC(P): 1:100-1:500, WB: 1:1000-1:5000, IP, ICC, FC, ELISA: To be determined by end **Applications:**

user

Purification: Aff. Pur.

> Nestin is a Class VI intermediate filament expressed in the developing central nervous system (CNS) in early embryonic neuroepithelial stem cells. This protein has been widely used as a predominant marker for stem / progenitor cells, glioma cells, and tumor endothelial cells in the mammalian CNS. Furthermore, it is a superior

angiogenic marker to evaluate neovascularity of endothelial cells in tumor. This **Background:**

highly specific antibody to human Nestin can aid in characterizing progenitor cells differentiating into distinct lineages, in enhancing the therapeutic potential of human neural stem/progenitor cells in the treatment of CNS diseases or injury, and in

identifying neuroepithelial tumor cells.

Form: Liquid

Buffer: PBS + 0.1% sodium azide;

Store at +4°C for one month, or in small aliquots at -20°C for longer term, Avoid **Storage:**

freeze and thaw cycles.
