

Cat. No:	AB-90186
Conjugate:	Unconjugated
Size:	100µg
Clone:	POLY
Concentration:	1mg/ml
Host:	Rabbit
Isotype:	IgG
Immunogen:	Immunogen A synthetic peptide corresponding to a sequence within amino acids 2456-2555 of human Notch1.
Reactivity:	Human, Mouse
Applications:	Western Blot: 1:500 - 1:2000 Immunoprecipitation: 0.5µg-4µg antibody for 200µg-400µg extracts of whole cells
Molecular Weight:	125kDa
Purification:	Affinity purification
Synonyms:	hN1; AOS5; TAN1; AOVD1; Notch1
Background:	<p>This gene encodes a member of the NOTCH family of proteins. Members of this Type I transmembrane protein family share structural characteristics including an extracellular domain consisting of multiple epidermal growth factor-like (EGF) repeats, and an intracellular domain consisting of multiple different domain types. Notch signaling is an evolutionarily conserved intercellular signaling pathway that regulates interactions between physically adjacent cells through binding of Notch family receptors to their cognate ligands. The encoded preproprotein is proteolytically processed in the trans-Golgi network to generate two polypeptide chains that heterodimerize to form the mature cell-surface receptor. This receptor plays a role in the development of numerous cell and tissue types. Mutations in this gene are associated with aortic valve disease, Adams-Oliver syndrome, Tcell acute lymphoblastic leukemia, chronic lymphocytic leukemia, and head and neck squamous cell carcinoma.</p>
Form:	Liquid
Buffer:	PBS with 0.02% sodium azide, 0.05% BSA, 50% glycerol, pH 7.3.
Storage:	Store at -20°C. Avoid freeze / thaw cycles.
