

Product Data Sheet: Pan Acetyl Lysine Rabbit Polyclonal Antibody

Cat. No: AB-84265

Conjugate: Unconjugated

Size: 100ug
Clone: POLY
Concentration: 1mg/ml
Host: Rabbit
Isotype: IgG

Immunogen: A synthetic peptide corresponding to a sequence containing acetylated K.

Reactivity: ALL SPEICES

Applications: Western Blot: 1:500 - 1:1000 Immunofluorescence: 1:50 - 1:200

Immunocytochemistry: 1:50 - 1:200

Purification: Affinity purification

Acetylation of lysine, like phosphorylation of serine, threonine or tyrosine, is an important reversible modification controlling protein activity. The conserved

aminoterminal

domains of the four core histones (H2A, H2B, H3, and H4) contain lysines that are acetylated by histone acetyltransferases (HATs) and deacetylated by histone deacetylases (HDACs) . Signaling resulting in acetylation/deacetylation of histones, transcription factors, and other proteins affects a diverse array of cellular processes

including chromatin structure and gene activity, cell growth, differentiation, and apoptosis . Recent proteomic surveys suggest that acetylation of lysine residues may be a widespread and important form of post-translational protein modification that affects thousands of proteins involved in control of cell cycle and metabolism, longevity, actin polymerization, and nuclear transport . The regulation of protein

acetylation status is impaired in cancer and polyglutamine diseases, and HDACs have become promising targets for anti-cancer drugs currently in development.

Form: Liquid

Background:

Buffer: PBS with 0.01% thimerosal,50% glycerol,pH7.3.

Storage: Store at -20°C. Avoid freeze / thaw cycles.

For Research use only IMMUNOLOGICAL SCIENCES
