

Cat. No:	AB-84772
Conjugate:	Unconjugated
Size:	100 ug
Clone:	POLY
Concentration:	1mg/ml
Host:	Rabbit
lsotype:	IgG
Immunogen:	Recombinant fusion protein containing a sequence corresponding to amino acids 896-1059 of human PDGFR alpha
Reactivity:	Human, Mouse, Rat
Applications:	Western Blot: 1:500 - 1:1000 Immunohistochemistry(paraffin embedded tissues) 1:50 - 1:200 Immunofluorescence: 1:50 - 1:200 Immunocytchemistry: 1:50 - 1:200
Molecular Weight:	150-190kDa
Purification:	Affinity purification
Synonyms:	CD140A; PDGFR2; PDGFR-2
Background:	This gene encodes a cell surface tyrosine kinase receptor for members of the plateletderived growth factor family. These growth factors are mitogens for cells of mesenchymal origin. The identity of the growth factor bound to a receptor monomer determines whether the functional receptor is a homodimer or a heterodimer, composed of both platelet-derived growth factor receptor alpha and beta polypeptides. Studies suggest that this gene plays a role in organ development, wound healing, and tumor progression. Mutations in this gene have been associated with idiopathic hypereosinophilic syndrome, somatic and familial gastrointestinal stromal tumors, and a variety of other cancers.
Form:	Liquid
Buffer:	PBS with 0.02% sodium azide,50% glycerol,pH7.3.
Storage:	Store at -20°C. Avoid freeze / thaw cycles.
