

Cat. No:	ABP-0432
Conjugate:	Unconjugated
Size:	100 ug
Clone:	Poly
Concentration:	1mg/ml
Host:	Rb
Isotype:	lgG
Immunogen:	A phospho specific peptide corresponding to residues surrounding T172 of human AMPK $\!\alpha$
Reactivity:	Hu, Ms, Rt
Applications:	WB
Molecular Weight:	64kDa
Purification:	Affinity purification
Synonyms:	AMPKa1/AMPKa2
Background:	The protein encoded by this gene belongs to the ser/thr protein kinase family. It is thecatalytic subunit of the 5'-prime-AMP-activated protein kinase (AMPK). AMPK is a cellularenergy sensor conserved in all eukaryotic cells. The kinase activity of AMPK is activated by the stimuli that increase the cellular AMP/ATP ratio. AMPK regulates the activities of anumber of key metabolic enzymes through phosphorylation. It protects cells fromstresses that cause ATP depletion by switching off ATP-consuming biosyntheticpathways. Alternatively spliced transcript variants encoding distinct isoforms have beenobserved. [provided by RefSeq, Jul 2008]
Form:	liquid
Buffer:	PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Storage:	Store at -20°C. Avoid freeze / thaw cycles
