

Product Data Sheet: Phospho-ATM-(\$1981)

Cat. No: ABP-0008

Conjugate: Unconjugated

Size: 100 ug
Clone: Poly
Concentration: 1mg/ml
Host: Rb

Isotype: IgG

Immunogen: A synthetic phosphorylated peptide around S1981 of human ATM

Reactivity: Hu

Applications: Western Blot: 1:500 - 1:2000 Immunofluorescence: 1:50 -1:200

Molecular Weight: 350kDa

Purification: Affinity purification

Synonyms: ATM; AT1; ATA; ATC; ATDC; ATE; TEL1; TELO 1; serine-protein kinase ATM

The protein encoded by this gene belongs to the PI3/PI4-kinase family. This protein is an important cell cycle checkpoint kinase that phosphorylates; thus, it functions as a regulator of a wide variety of downstream proteins, including tumor suppressor proteins p53 and BRCA1, checkpoint kinase CHK2, checkpoint proteins

Background: RAD17 and RAD9, and DNA repair protein NBS1. This protein and the closely

related kinase ATR are thought to be master controllers of cell cycle checkpoint signaling pathways that are required for cell response to DNA damage and for genome stability. Mutations in this gene are associated with ataxia telangiectasia,

an autosomal recessive disorder.

Form: liquid

Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Storage: Store at -20°C. Avoid freeze / thaw cycles.

For Research use only IMMUNOLOGICAL SCIENCES
