

## Product Data Sheet: Phospho-Jun-(\$73)

**Cat. No:** ABP-0047

Conjugate: Unconjugated

Size: 100 ug
Clone: Poly
Concentration: 1mg/ml

Host: Rb
Isotype: IgG
Reactivity: Hu

**Applications:** WB: 1:1000, IF-IC: 1:200

Molecular Weight: 48 kDa

Polyclonal antibodies are produced by immunizing animals with a synthetic phosphopeptide corresponding to residues around Ser73 of human c-Jun.

Antibodies are purified by protein A and peptide affinity chromatography.

c-Jun is a member of the Jun Family con¬taining c-Jun, JunB and JunD, and is a component of the transcription factor AP-1 (activator protein-1). AP-1 is com¬posed of dimers of Fos, Jun and ATF family members and binds to and activates transcription at TRE/AP-1 elements (reviewed in 1). Extracellular signals including growth fac¬tors, chemokines and stress activate AP-1-dependent

tran-scription. The transcriptional activity of c-Jun is regulated by

phosphorylation at Ser63 and Ser73 through SAPK/JNK (reviewed in 2). Knock-out studies in mice have shown that c-Jun is essential for embryogenesis (3), and subsequent studies have demonstrated roles for c-Jun in various tissues and

developmental processes including axon regeneration (4), liver regeneration (5) and T cell development (6). AP-1 regulated genes exert diverse biological functions including cell proliferation, differentiation, and apoptosis, as well as transformation, invasion and metastasis, depending on cell type and context (7-9). Other target genes regulate survival as well as hypoxia and angiogenesis (8,10). c-Jun has emerged as a promising therapeutic target for cancer, vas¬cular remodeling, acute inflammation, as well as rheumatoid arthritis (11,12). Phospho-

c-Jun (Ser73) Antibody detects endogenous levels of c-Jun only when

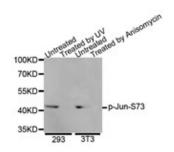

phosphorylated at Ser73.

Form: liquid

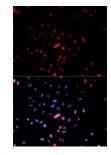

**Background:** 

**Buffer:** Supplied in 0.02% sodium azide, 50% glycerol, pH7.3.

**Storage:** Store at -20°C. Do not aliquot the antibody.

Immunofluorescence analysis using
