

Cat. No:	AB-10089
Conjugate:	Unconjugated
Size:	100 ug
Clone:	POLY
Concentration:	1mg/ml
Host:	Rb
lsotype:	IgG
Immunogen:	Recombinant fusion protein containing a sequence corresponding to amino acids 1-160 of human PSEN1
Reactivity:	Hu,Ms,Rt
Applications:	Western Blot: 1:500 - 1:1000 Immunohistochemisty: 1:50 - 1:100
Molecular Weight:	53kDa
Purification:	Aff. Pur.
Synonyms:	PSEN1; AD3; FAD; PS-1; PS1; S182; presenilin-1
Background:	Alzheimer's disease (AD) patients with an inherited form of the disease carry mutations in the presenilin proteins (PSEN1; PSEN2) or in the amyloid precursor protein (APP). These disease-linked mutations result in increased production of the longer form of amyloid-beta (main component of amyloid deposits found in AD brains). Presenilins are postulated to regulate APP processing through their effects on gamma-secretase, an enzyme that cleaves APP. Also, it is thought that the presenilins are involved in the cleavage of the Notch receptor, such that they either directly regulate gamma-secretase activity or themselves are protease enzymes. Several alternatively spliced transcript variants encoding different isoforms have been identified for this gene, the full-length nature of only some have been determined.
Form:	Liquid
Buffer:	PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Storage:	Store at -20°C. Avoid freeze / thaw cycles.Store at -20°C. Avoid freeze / thaw cycles.
