

Product Data Sheet: ROR2

Cat. No: AB-84241
Size: 100 ug
Clone: POLY
Concentration: 1mg/ml
Host: Rb

Isotype: IgG

A synthetic peptide corresponding to a sequence within amino acids 100-200 of

human ROR2 (NP_004551.2).

Reactivity: Hu, Rt, Ms

Applications: Western Blot: 1:500 - 1:2000 Immunohistochemistry: 1:100 - 1:200

Molecular Weight: 135kDa **Purification:** Aff. Pur.

Synonyms: ROR2;BDB;BDB1;NTRKR2

The protein encoded by this gene is a receptor protein tyrosine kinase and type I

transmembrane protein that belongs to the ROR subfamily of cell surface

receptors. The protein may be involved in the early formation of the chondrocytes and may be required for cartilage and growth plate development. Mutations in this gene can cause brachydactyly type B, a skeletal disorder characterized by

hypoplasia/aplasia of distal phalanges and nails. In addition, mutations in this gene can cause the autosomal recessive form of Robinow syndrome, which is characterized by skeletal dysplasia with generalized limb bone shortening, segmental defects of the spine, brachydactyly, and a dysmorphic facial

appearance.

Form: Liquid

Background:

Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.

Storage: Store at -20°C. Avoid freeze / thaw cycles.
