

Product Data Sheet: RPS6 Rabbit Monoclonal Antibody

Cat. No: MAB-94701
Conjugate: Unconjugated

Size: 100 ug

Clone: 5G10

Concentration: 1mg/ml

Host: Rb

Isotype: IgG

Immunogen: Recombinant fusion protein containing a sequence corresponding to amino acids

1-130 of human RPS6

Reactivity: Hu, Ms, Rt

Applications: WB 1:500 - 1:2000 IF 1:50 - 1:200 ICC 1:50 - 1:200

Molecular Weight: 32kDa **Purification:** Aff. Pur.

Synonyms: RPS6;S6;S6 Ribosomal Protein

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a cytoplasmic ribosomal protein that is a component of the 40S subunit. The protein belongs to the S6E family of ribosomal proteins. It is the major substrate of protein kinases in the ribosome, with subsets of five C-terminal erine residues

Background: phosphorylated by different protein kinases. Phosphorylation is induced by a wide

range of stimuli, including growth factors, tumor-promoting agents, and

mitogens. Dephosphorylation occurs at growth arrest. The protein may contribute to the control of cell growth and proliferation through the selective translation of particular lasses of mRNA. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the

genome.

Form: Liquid

Buffer: PBS with 0.05% proclin300,0.05% BSA,50% glycerol,pH7.3.

Storage: Store at -20°C. Avoid freeze / thaw cycles.

For Research use only IMMUNOLOGICAL SCIENCES
