

Product Data Sheet: Splicing Factor 1 Rabbit Polyclonal Antibody

Cat. No: AB-84791

Conjugate: Unconjugated

Size: 100 ug Clone: **POLY Concentration:** 1mg/ml Host: Rabbit Isotype: IgG

The antiserum was produced against synthesized peptide derived from human Immunogen:

SF1. AA range:48-97

Reactivity: Human; Mouse

Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300 **Applications:**

Immunofluorescence: 1/200 - 1/1000

Molecular Weight: 68kD

The antibody was affinity-purified from rabbit antiserum by affinity-**Purification:**

chromatography using epitope-specific immunogen.

SF1; ZFM1; ZNF162; Splicing factor 1; Mammalian branch point-binding protein; **Synonyms:**

BBP; mBBP; Transcription factor ZFM1; Zinc finger gene in MEN1 locus; Zinc

finger protein 162

This gene encodes a nuclear pre-mRNA splicing factor. The encoded protein specifically recognizes the intron branch point sequence at the 3' splice site, together with the large subunit of U2 auxiliary factor (U2AF), and is required for the early stages of spliceosome assembly. It also plays a role in nuclear premRNA retention and transcriptional repression. The encoded protein contains an

N-terminal U2AF ligand motif, a central hnRNP K homology motif and guaking 2 region which bind a key branch-site adenosine within the branch point sequence,

a zinc knuckles domain, and a C-terminal proline-rich domain. Alternative splicing

results in multiple transcript variants.

Form: Liquid

Background:

Buffer: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
