

Product Data Sheet: STAT 3 Rabbit Polyclonal Antibody

Cat. No: AB-83813

Conjugate: Unconjugated

Size: 100 ug

Clone: POLY

Concentration: 1mg/ml

Host: Rb

Isotype: IgG

Immunogen: The antiserum was produced against synthesized peptide derived from human

STAT3. AA range:672-721

Reactivity: Hu, Ms,Rt

Applications: Western Blot: 1/500 1/2000 Immunofluorescence: 1:50-200

Immunohistochemistry: 1/100 - 1/300 ELISA:1/5000

Molecular Weight: 88kD

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Synonyms: STAT3; APRF; Signal transducer and activator of transcription 3; Acute-phase

response factor

The protein encoded by this gene is a member of the STAT protein family. In response to cytokines and growth factors, STAT family members are

phosphorylated by the receptor associated kinases, and then form homo- or heterodimers that translocate to the cell nucleus where they act as transcription activators. This protein is activated through phosphorylation in response to

various cytokines and growth factors including IFNs, EGF, IL5, IL6, HGF, LIF and BMP2. This protein mediates the expression of a variety of genes in response to

cell stimuli, and thus plays a key role in many cellular

processes such as cell growth and apoptosis. The small GTPase Rac1 has been shown to bind and regulate the activity of this protein. PIAS3 protein is a specific inhibitor of this protein. Mutations in this gene are associated with infantile-onset

multisystem autoimmune disease and hyper

Form: Liquid

Background:

Buffer: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Storage: Store at -20°C. Avoid repeated freeze-thaw cycles.
