

## Product Data Sheet: Stat3 (phospho Ser727) Rabbit Polyclonal Antibody

**Cat. No:** ABP-5041

Conjugate: Unconjugated

Size: 100 ug

Clone: POLY

Concentration: 1mg/ml

Host: Rabbit

Isotype: IgG

Immunogen: The antiserum was produced against synthesized peptide derived from human

STAT3 around the phosphorylation site of Ser727. AA range:694-743

**Reactivity:** Human; Mouse; Rat; Monkey

Western Blot: 1/500 1/2000.Immunofluorescence: 1:50-200

**Applications:** Immunohistochemistry: 1/100 - 1/300 Immunoprecipitation: 2-5 ug/mg lysate

ELISA: 1/10000.

Molecular Weight: 85kD

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

**Synonyms:** STAT3; APRF; Signal transducer and activator of transcription 3; Acute-phase

response factor

The protein encoded by this gene is a member of the STAT protein family. In

response to cytokines and growth factors, STAT family members are

phosphorylated by the receptor associated kinases,

and then form homo- or heterodimers that translocate to the cell nucleus where

they act as transcription activators. This protein is activated through

phosphorylation in response to various

**Background:** cytokines and growth factors including IFNs, EGF, IL5, IL6, HGF, LIF and BMP2.

This protein mediates the expression of a variety of genes in response to cell stimuli, and thus plays a key role in many cellular processes such as cell growth and apoptosis. The small GTPase Rac1 has been shown to bind and regulate the activity of this protein.

activity of this protein. PIAS3 protein is a specific inhibitor of this protein. Mutations in this gene are associated with infantile-onset multisystem

autoimmune disease and hyper

Form: Liquid

**Buffer:** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

**Storage:** Store at -20°C. Avoid repeated freeze-thaw cycles.
