

Product Data Sheet: VEGF-A Rabbit Polyclonal Antibody

Cat. No: AB-84796

Conjugate: Unconjugated

Size: 100 ug

Clone: POLY

Concentration: 1mg/ml

Host: Rabbit

Isotype: IgG

Applications:

Background:

Immunogen: The antiserum was produced against synthesized peptide derived from human

VEGF-A. AA range:110-159

Reactivity: Human, Mouse, Rat

Western Blot: 1/500 - 1/2000 Immunofluorescence: 1:50-200

Immunohistochemistry: 1/100 – 1/300

Molecular Weight: 21kD(monomer),42kD(dimer)

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Synonyms: VEGFA; VEGF; Vascular endothelial growth factor A; VEGF-A; Vascular

permeability factor; VPF

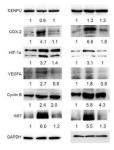

This gene is a member of the PDGF/VEGF growth factor family. It encodes a heparin-binding protein, which exists as a disulfide-linked homodimer. This growth factor induces proliferation and migration of vascular endothelial cells, and is essential for both physiological and pathological angiogenesis. Disruption of this gene in mice resulted in abnormal embryonic blood vessel formation. This gene is upregulated in many known tumors and its expression is correlated with

tumor stage and progression. Elevated levels of this protein are found in patients with POEMS syndrome, also known as Crow-Fukase syndrome. Allelic variants of this gene have been associated with microvascular complications of diabetes 1 (MVCD1) and atherosclerosis. Alternatively spliced transcript variants encoding

different isoforms have been described.

Form: Liquid

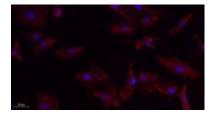

Buffer: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
