| <b>Immunogen:</b>        | A synthetic peptide of human Lamin B2                                                                                                                                                                                        |
| <b>Reactivity:</b>       | Human, Mouse, Rat                                                                                                                                                                                                            |
| <b>Applications:</b>     | WB 1:500-1:1000                                                                                                                                                                                                              |
| <b>Molecular Weight:</b> | Calculated MW: 70 kDa; Observed MW: 70 kDa                                                                                                                                                                                   |
| <b>Purification:</b>     | Affinity Purification                                                                                                                                                                                                        |
| <b>Form:</b>             | Liquid                                                                                                                                                                                                                       |
| <b>Buffer:</b>           | 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% Sodium azide and 0.05% BSA                                                                                                                                        |
| <b>Storage:</b>          | Store at 4°C short term. Aliquot and store at -20°C for 12 months. Avoid freeze/thaw cycles.                                                                                                                                 |
| <b>Background:</b>       | Lamins are components of the nuclear lamina, a fibrous layer on the nucleoplasmic side of the inner nuclear membrane, which is thought to provide a framework for the nuclear envelope and may also interact with chromatin. |
