| <b>Storage:</b>          | Store at 4°C short term. Aliquot and store at -20°C for 12 months. Avoid freeze/thaw cycles.                                                                                                                                                                                                                                                                                                                                   |
| <b>Background:</b>       | MAP4K1 (Mitogen-Activated Protein Kinase Kinase Kinase 1) is a Protein Coding gene. Among its related pathways are Angiopoietin Like Protein 8 Regulatory Pathway and B cell receptor signaling pathway (KEGG). Gene Ontology (GO) annotations related to this gene include transferase activity, transferring phosphorus-containing groups and protein tyrosine kinase activity. An important paralog of this gene is MAP4K3. |
