

Product name:	WNK2 Rabbit Polyclonal Antibody
Cat number:	ABN19911
Conjugate:	Unconjugated
Size:	100µL
Clone:	Polyclonal
Concentration:	1mg/ml
Host:	Rabbit
Isotype:	IgG
Immunogen:	Synthesized peptide derived from human protein . at AA range: 1120-1200
Reactivity:	Human, Mouse
Applications:	IHC 1:50-1:300, ICC/IF 1:50-1:200
Molecular Weight:	252kDa
Purification:	Affinity purification
Form:	Liquid
Buffer:	Liquid in PBS containing 50% glycerol, and 0.02% New type preservative N.
Storage:	Store at 4°C short term. Aliquot and store at -20°C for 12 months. Avoid freeze/thaw cycles.
Background:	The protein encoded by this gene is a cytoplasmic serine-threonine kinase that belongs to the protein kinase superfamily. The protein plays an important role in the regulation of electrolyte homeostasis, cell signaling survival, and proliferation. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Sep 2013], catalytic activity: ATP + a protein = ADP + a phosphoprotein., caution: Cys-224 is present instead of the conserved Lys which is expected to be an active site residue. Lys-207 appears to fulfill the required catalytic function., cofactor: Magnesium., enzyme regulation: Activation requires autophosphorylation of Ser-356. Phosphorylation of Ser-352 also promotes increased activity., similarity: Belongs to the protein kinase superfamily. Ser/Thr protein kinase family. WNK subfamily., similarity: Contains 1 protein kinase domain., tissue specificity: Predominantly expressed in heart, brain and colon.,
