

**IS-22412 Goat Anti-Rat IgG (H+L), Highly Cross-Adsorbed
Min X Hu, Bv, Hs, Rb
HRP Conjugated Secondary Antibodies**

Size: 1mL

Product Description

This product is prepared by labeling IgG (H+L) or recombinant streptavidin with horseradish peroxidase. HRP conjugates can be used for western blot, ELISA, immunohistochemistry and other standard immunoassay applications.

Concentration

Liquid format: 1 mg/mL in pH ~7.4 PBS containing 50% glycerol and 15 mg/ml bovine serum albumin (IgG-free and protease-free).

Storage and Handling

Store at -20°C. Product is stable for at least 6 months from date of receipt when stored as recommended.

Reconstitution (lyophilized format only): add 1 mL pH ~7.4 1X PBS and mix gently to dissolve. Reconstituted HRP conjugate can be stored in aliquots at -20°C for at least 6 months. Do not add azide to HRP conjugates.

Recommended Dilution Range

For most secondary antibody applications, a concentration of 1-10 ug/mL is sufficient; however, appropriate dilutions should be determined empirically.
