

ISBR-7301-05 5X TBS (Tris Buffered Saline) Powder Sachet

Size: 5 sachets of 5x TBS powder (make 25 litres)

Each Powder sachet makes 1 litre of **5 x Tris Buffered Saline** or 5 litres of **1x TBS** working strength.

Convenient ready to use pack formulating buffer when reconstituted in deionised purified 18MOhms Water.

TBS (Tris Buffered Saline) is a buffer used in lab biochemical techniques to maintain the pH within a relatively narrow range.

Typically used in immunology techniques as a wash buffer.

TBS has many uses because it is isotonic and non-toxic. It can be used to dilute substances.

Store the buffer solution at +4°C.

Final (1X) pH 7.4 ±0.2 (25°C), may need slight pH adjustment.
