

IMMUNOLOGICAL SCIENCES

Dear Valued Customer,

Immunological Sciences' flow cytometry antibodies have a wide range of dye choices and a wide range of both intracellular and extracellular protein targets to choose from, and the labeling ability and affinity have been validated. With selected high-quality FACS monoclonal antibodies and excellent fluorescent labeling technology, flow cytometry antibodies (FACS) are dedicated to help you efficient identification of immune cells and easily identify cell activation status. View and choose the most suitable antibody for flow cytometry with your research.
