

Product name:	IL-10 Rabbit Polyclonal Antibody
Cat number:	ABE3868
Conjugate:	unconjugated
Host:	Rabbit
Size:	100 ug
Synonyms:	IL10; Interleukin-10; IL-10; Cytokine synthesis inhibitory factor; CSIF
Clone:	Polyclonal
Concentration:	1 mg/ml
Isotype:	IgG
Immunogen:	The antiserum was produced against synthesized peptide derived from the Internal region of human IL10. AA range:71-120
Reactivity:	Human;Mouse;Rat
Applications:	Western Blot: 1/500 - 1/2000. IHC-p: 1:100-300 ELISA: 1/20000. IF 1:100-300 Not yet tested in other applications.
Molecular Weight:	20kD
Background:	The protein encoded by this gene is a cytokine produced primarily by monocytes and to a lesser extent by lymphocytes. This cytokine has pleiotropic effects in immunoregulation and inflammation. It down-regulates the expression of Th1 cytokines, MHC class II Ags, and costimulatory molecules on macrophages. It also enhances B cell survival, proliferation, and antibody production. This cytokine can block NF-kappa B activity, and is involved in the regulation of the JAK-STAT signaling pathway. Knockout studies in mice suggested the function of this cytokine as an essential immunoregulator in the intestinal tract. Mutations in this gene are associated with an increased susceptibility to HIV-1 infection and rheumatoid arthritis.[provided by RefSeq, May 2011],
Form:	liquid
Storage:	-20°C/1 year

For Research Use Only
