

<b>Product name:</b>	APC Anti-Human CD1a Antibody[OKT-6]
<b>Cat number:</b>	MAB1126E
<b>Conjugate:</b>	APC
<b>Size:</b>	100Tests
<b>Clone:</b>	OKT-6
<b>Concentration:</b>	5 µL/Test
<b>Host:</b>	Mouse
<b>Isotype:</b>	Mouse IgG1, κ
<b>Reactivity:</b>	Human
<b>Applications:</b>	FCM - Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 µL staining volume or per 100 µL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
<b>Form:</b>	Liquid
<b>Buffer:</b>	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer.
<b>Storage:</b>	This product can be stored at 2-8°C for 24 months. Please protected from prolonged exposure to light and do not freeze.
<b>Synonyms:</b>	CD1A;CD1;FCB6;HTA1;R4;T6;T-cell surface glycoprotein CD1a;T-cell surface antigen T6/Leu-6
<b>Background:</b>	CD1a is a 49 kD member of the immunoglobulin superfamily also known as T6 and R4. It is a type I membrane glycoprotein with structural similarities to MHC class I and is non-covalently associated with β2-microglobulin. CD1a plays a role in non-peptide glycolipid antigen presentation to CD1-restricted T cells. It is expressed on cortical double positive and single positive thymocytes, Langerhans cells, and dendritic cells. In addition to antigen presentation, CD1a has been implicated in thymic T cell development.
